

Softlib's iSolve for Mainframe Environment

**All relevant technical information
at your fingertips**

iSolve Technical Reference for Mainframe is the only technical reference based on all possible information sources - vendor technical information, Web news groups/forums and internal/corporate sources.

iSolve offers a superset of traditional Mainframe Technical Reference Software capabilities, implemented on-premise or SaaS. With iSolve developers and IT experts get the right type of information they need quickly and easily!

Key Capabilities

- One point of access to Search / Browse for all your technical information sources:
 - » Vendor documentation – MVS and related products, hardware, software, Open Systems, etc
 - » Relevant corporate documents on file servers, portals, etc
 - » External data sources such as Web forums and news groups
- iSolve access to information is powered by intelligent free text search engine and unique graphical user interface
- With iSolve it's easy to add collaborative data on top of the documentation and share it with relevant peers
- iSolve allows each user to personalize and customize his information access
- Documentation automatically updated when new information becomes available
- Modern Web based solution accessible from every browser
- Seamless integrations with portals and service applications

Key Benefits

- Substantial cost savings through immediate access to the right knowledge:
 - » Fast Error codes and Commands Lookup
 - » Internal and external information repositories
 - » Full integration with terminal emulators
- On-premise or SaaS implementation
- Immediate ROI - Easy to implement and use, up and running in days
